

## METHOD FOR TRANSLATING THE AGREE II

The methods used for translating and assessing the quality of translations of the AGREE II was derived from previous work on the translation of evaluation instruments. The method for translating the AGREE II follows the procedures outlined below in five consecutive steps:

*The translation of the AGREE II from English to another language is the responsibility of the translator(s). The AGREE Research Trust has provided a method to guide the translation process and a checklist to be completed by the translator(s) to ensure the method has been followed. The AGREE Research Trust makes no representation or guarantees of any kind whatsoever regarding the accuracy, content or use or application of any translated AGREE II and disclaims any for their application or use in any way.*
